

Gael Force Robotics

Sponsorship Packet

OUR TEAM

WHO ARE WE?

Gael Force Robotics is a group of VEX Robotics Competition teams, maintaining 150+ club members every school year. We pride ourselves on imparting important technical, communication, and leadership skills on our club members, but also on our community outreach. Whether it's through our Gael Force Academy, annual tournaments we host, or other events we organize, we're always looking to give back to our community.

- **Largest Robotics Organization in Dublin, CA**
- **Students from every local middle school**
- **Promoting STEM at Dublin High School for 12+ years (Founded in 2010)**
- **Outstanding community of engineering oriented students**
- **140+ awards earned at the regional, state and international level**

OUR STUDENTS...

- Learn critical leadership and communication skills
- Compete in the VEX Robotics Competition
- Develop STEM and technical knowledge through prototyping and programming, as well as through writing technical documentation
- Serve as mentors for younger students

BIGGER THAN VEX

OUTREACH

While we're avid competitors in VEX, we also give back to our community through our...

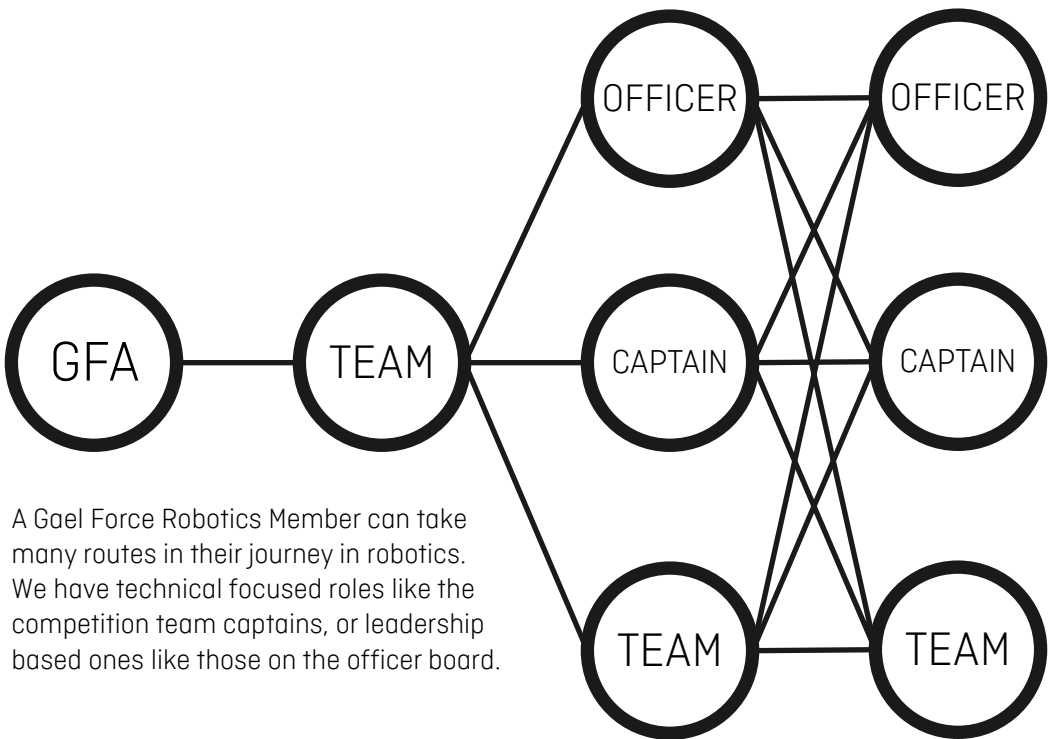

- Gael Force Academy
- Battle of the Bay Tournaments
- Girl Powered Workshops

GAEL FORCE ACADEMY

- Experienced competitors and alumni mentor younger and newer students
- Prepares newer students for the VEX Robotics Competition
- 100+ freshmen and new members every school year
- GFA graduates go on to become Gael Force Robotics leaders and competition team captains

THE GAEL FORCE PATHWAY

A Gael Force Robotics Member can take many routes in their journey in robotics. We have technical focused roles like the competition team captains, or leadership based ones like those on the officer board.

EVENTS

BATTLE OF THE BAY

For over 6 years, Gael Force Robotics has been running our annual tournament, held at Dublin High School: Battle of the Bay (BOTB). Having a reputation for one of the best run VEX events in our region, we strive to uphold this reputation every year. While holding BOTB, we make great efforts to...

- Cater to individual teams' needs
- Create a both fun and competitive environment
- Ensure the best experience for both our volunteers and our competitors
- Provide opportunities for local teams to qualify to the higher levels of VEX Competition
- Uphold our club's regional reputation
- Ensure a free flowing and efficient event

THE FUTURE

PLANNING FOR THE FUTURE

We at Gael Force Robotics, recognizing that our club has existed for almost 12 years, know that it's time for us to expand as an organization. We've recently embarked on several initiatives that will allow us to do so, with your support. The first one is GaelSuite, quite literally a suite of applications that will improve VEX competitors' experiences, ranging from a CAD software that will easily allow design communication, to GaelTourney, an application that seeks to make running VEX tournaments much more efficient. The second one is a Girl Powered Workshop, raising awareness about the lack of women in STEM fields, as well as the lack of gender balance in our own club.

GAELSUITE

An initiative started by one of our alumni, GaelSuite has quickly grown into a group of 30+ Gael Force Robotics students working to develop industry level software. The initiative includes several distinct projects, all with their own goals in mind.

- GaelCAD: Our very own CAD software, designed for students to make communicating ideas much quicker.
- GaellIoT: A set of trinkets that can enrich a VEX tournament: automatic team queuers, light up fields, AI controlled cameras, etc.
- GaelTourney: Software that makes running a VEX tournament much more efficient, running matches at lightning speed.
- GaelLabs: A curriculum designed to quickly educate younger children about VEX building and programming.
- GaelScout: An app that streamlines the process of scouting other teams at VEX tournaments.

GIRL POWERED

With so few women in our club, and even fewer women in positions of leadership, in late July of 2022, we at GFR decided it was time for us to hold our own Girl Powered Workshop. Since then, our event, being held in October 2022 is being planned by our Event and Finance team, aimed at introducing VEX to middle school girls and our club as a whole.

GOLD SPONSOR

\$3000+ in donations, goods, or services

Benefits:

Request Gael Force Robotics to be at company events
Logo required to be featured on all merchandise, robots, and promotional material
Invitation to Gael Force Robotics Events, honorable mentions during event opening ceremonies

SILVER SPONSOR

\$1500-3000 in donations, goods, or services

Benefits:

Logo on website and merchandise
Invitation to Gael Force Robotics Events, honorable mentions during event opening ceremonies

BRONZE SPONSOR

Up to \$1500 in donations, goods, or services

Benefits:

Logo featured on website and club videos

CONTACT US

If you want to be part of our program, or want more information regarding Gael Force Robotics, please email us at **gaelforcerobotics@gmail.com**

With your contribution, we can keep doing all the things described in this packet,
Thank you so much for your consideration!
